# AR and VR in Healthcare

Exploring possible implementations of virtual and augmented reality technologies in the healthcare sector

# Ideas

What are some potential use cases for AR or VR in healthcare? Where do these spaces intersect?

How can these be implemented in a way that improves quality of care?

# Research Methods

Research into the current state of AR/VR tech to determine where a potential intersection may exist
App Development

# Findings/Conclusions

Current state of AR limited, new things coming
VR in more clinical applications

Technology = Data
